

LexisNexis®

Risk Intelligence Network

Shared Intelligence for Improved Risk Decisions

Gain a differentiated perspective
of risk across fraud, identity,
credit and compliance.

Today's global market is defined by complex and shifting risk, fluid regulatory environments and accelerated transaction speeds. Achieving and maintaining success requires a balanced focus on customer experience, regulatory compliance and the ability to detect risk quickly at every touchpoint.

The roadblock? Incomplete consumer and business insights lead to visibility gaps—often meaning you're making decisions with a limited picture of risk. Connecting to global, cross-industry intelligence is essential to gaining comprehensive identity and behavioural insights needed to make informed, confident risk decisions.

Solve risk better, together, with collective insights

A limited view of an individual or business is a limited view of risk. To sharpen decision-making precision, reduce delays and improve operational efficiencies, you first need a more comprehensive perspective—one that provides a 360-degree view of identity and transaction risks. Achieving this requires access to shared intelligence that spans industries, use cases and geographies.

The LexisNexis® Risk Intelligence Network is a global ecosystem of contributory, cross-industry risk intelligence. By interacting with our industry-leading products, participating organisations are connected to a vast pool of shared insights that can help you build a more dynamic, real-time understanding of risk. RELY ON A SINGLE SOURCE OF TRUTH FOR AUTHENTIC USERS

Fuelled by a mutual desire to understand, predict and mitigate risk across business functions, the LexisNexis® Risk Intelligence Network is designed to elevate and refine risk decision-making. This **industry-leading contributory network** empowers businesses with a multi-dimensional perspective on fraud, identity, credit risk and compliance use cases—all to enable:

Faster, smarter risk decisions

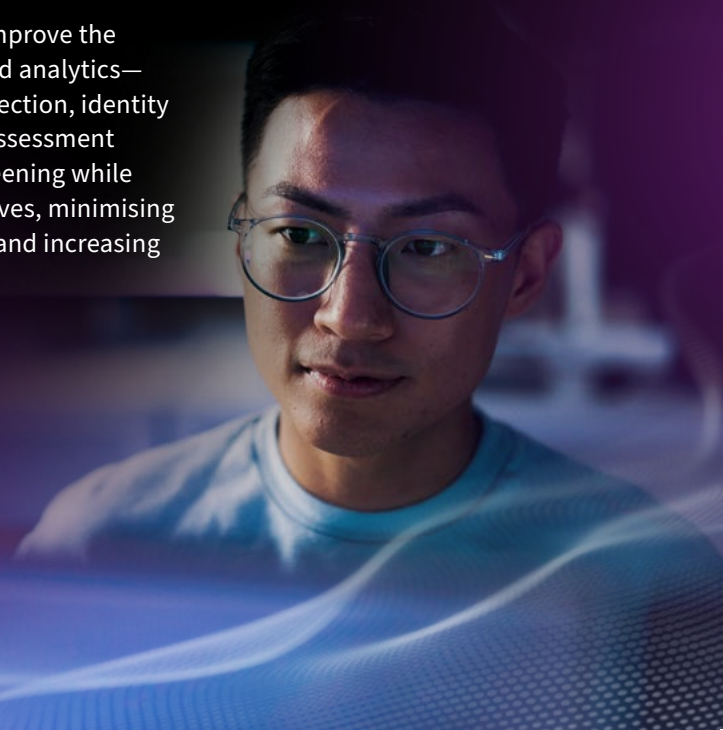

Gain a holistic view of individuals and entities, exposing hidden risks not available with isolated data sources. Improved visibility of risk indicators can yield faster, more confident decisions across the customer lifecycle.

Safer global commerce

Access cross-industry intelligence to identify emerging threats, detect suspicious behaviours and reduce transaction risk to keep ahead of evolving risks and support a healthier financial ecosystem.

Enhanced risk model precision

Shared data helps improve the accuracy of advanced analytics—enhancing fraud detection, identity verification, credit assessment and compliance screening while reducing false positives, minimising operational friction and increasing efficiency.

Mitigate risk enterprise-wide with responsible data sharing

When participating organisations share customer event data and performance outcomes, they enable the industry—and themselves—to make smarter decisions rooted in responsible data stewardship. This collaboration helps identify bad actors and high-risk entities, enhancing safety and security across the broader global marketplace.

Predict, manage and reduce risk across your organisation with powerful collective insights that identify high-risk individuals and entities. ➔

LEXISNEXIS®
RISK INTELLIGENCE
NETWORK

STRATEGIC DATA
PARTNERS

The LexisNexis® Risk Intelligence Network is a dynamic environment that leverages our advanced analytics and linking technology to bring together contributed data on transactions, account details and performance outcomes. This creates a continually refreshed view of an individual or entity while uncovering patterns and leading indicators of risk. The result is actionable intelligence that can be leveraged in specific and permissible use cases, including fraud prevention, identity verification, credit risk assessment and compliance.

Fraud Prevention

Leverage a vast pool of contributory insights to accelerate trusted transactions—while applying the right level of friction to risky events.

Credit Risk Assessment

Expand your understanding of credit risk and opportunities with intelligence including new and emerging consumers, life events and contact details.

Identity Verification

Quickly recognise and validate trusted identities and entities, detect discrepancies and adapt to changing behaviours with a network informed by billions of digital and physical data points.

Compliance

Support efficient compliance screening with comprehensive, current and expertly curated intelligence built from millions of profiles around the world.
